## Chapter 4

# Introduction

You can label chapter and section titles using `{#label}` after them, e.g., we can reference Chapter 4. If you do not manually label them, there will be automatic labels anyway, e.g., Chapter 6.

Figures and tables with captions will be placed in `figure` and `table` environments, respectively.

```
par(mar = c(4, 4, .1, .1))
plot(pressure, type = 'b', pch = 19)
```

Reference a figure by its code chunk label with the `fig:` prefix, e.g., see Figure 4.1. Similarly, you can reference tables generated from `knitr::kable()`, e.g., see Table 4.1.

```
knitr::kable(
  head(iris, 20), caption = 'Here is a nice table!',
  booktabs = TRUE
)
```

You can write citations, too. For example, we are using the **bookdown** package (Xie, 2018) in this sample book, which was built on top of R Markdown and **knitr** (Xie, 2015).

## Chapter 5

# Literature

Here is a review of existing methods.

## Chapter 6

# Methods

We describe our methods in this chapter.

## Chapter 7

# Applications

Some *significant* applications are demonstrated in this chapter.

### 7.1 Example one

### 7.2 Example two

## Chapter 8

# Final Words

We have finished a nice book.
